OBJECTIVE

- Hard working and quick learner with 10-15 years experience in GCC and Africa in machine operations and management .Seeking to use my multi-tasking skills and problem solving capabilities. - Professional machine operator specializing in troubleshooting, calibrating, monitoring, operating of high-speed production lines in food industry and pharmaceutical company.Detailed - Seeking to use my years of experience in machine operations and management in planning task, performing work to meet production goals, maintaining activity logs, detecting malfunction and conducting repairs and looking forward to bring same level of expertise into my next role. - Detail-oriented machine operator with 15 years of experience streamlining production operations by skilfully operating and maintaining manufacturing equipment. Seeking the position of a machine operator in my next role to utilise my profound technical, analytical and attention to detail skills to ensure defect free product. - Looking for a position as a machine in my next role so as to be able to utilise my excellent communication skills and team-working abilities to install machines and ensure that they meet all design parameters of the blueprints. I have years of experience using callipers and micrometres, reading blueprints, performing regular testing procedures and have knowledge of basic hand tools.

SKILLS

- Troubleshooting Line Startup and shutdown Attention to details Communication Problem solving Machine Operation Team work Safety Procedure Line Maintenance Computer literacy Line Assembly Proficiency with hand tools Regulatory Compliance Risk Assessment Team Management Record Keeping

EXPERIENCE

2013 - 2024

- **Senior Production Technician**
NESTLÉ NIGERIA PLC
 - Overseeing production process and ensuring product are made according to established specifications, schedule and quality standards
 - Install equipment and system,supervises installation and assembly work done by other Technician and external vendor
 - Ensure all plant and equipment are operated and maintained by the manufacturer’s instructions
 - Read drawings, specifications, and equipment manuals to assist with troubleshooting and repair Liaising with the team on work orders and scheduled maintenance
 - Fault finding and repair of complex circuits and components
 - Develop a solid and collaborative working relationship with the team
 - Provide knowledge in the maintenance and repair of highly technical equipment, supporting our fleet of cranes, specialist foundation and ground improvement equipment
 - Line operations, set-up and shutdown

2011 - 2013

- **Line Operator**
COCA-COLA FACTORY, DUBAI, UAE
 - Operating machinery, troubleshooting issues and monitoring production
 - Ability to follow procedures and work instructions
 - Maintain workcenter production quotas
 - Understands and applies quality product standards
 - Baseline knowledge of product scrap/defect issues
 - Responsible for the proper filtering of the process water used for Lines 2 & 3, and the disposal of waste generated during the filtering
 - Read and interpret work orders and/or machine diagrams

- Operates filling and packaging equipment continually
- Maintain work area organization and achieve company safety objectives
- Identifying and troubleshooting minor repair issues
- Respect and uphold GMP guidelines
- Keep all machines and tools clean
- Set up/adjust/run various filling machines
- Detect equipment malfunctions/misalignments
- Properly fill out production logs
- I anticipate problems and takes initiative to preventative measures

2008 - 2011

- **Production Supervisor**
TUYIL PHARMACEUTICALS COMPANY , ILORIN, KWARA STATE , NIGERIA
 - Contribute to the design and development of mechanical systems and components for processing of varieties of drugs, meeting performance, cost and schedule requirements.
 - Conduct feasibility studies, conceptual design reviews and detail engineering analysis to support project decision making and optimize design solutions.
 - Participate in prototype fabrication, testing and validation activities, identifying design improvements and addressing any performance or reliability issues.
 - Collaborate with cross functional teams to address manufacturing, quality and supply chain consideration.
 - Prepare technical documentation including design specifications, engineering drawings and test report to support project documentation and regulatory compliance.

EDUCATION

2007

- **Osun State College Of Technology, Esa-Oke, Nigeria**
Mechanical Engineering
2.2

2003

- **Kwara State Polytechnic, Ilorin, Kwara State, Nigeria**
Mechanical Engineering
2.2

CERTIFICATION AND TRAINING

- TheeGarten -Pactec GMBH &CO.KG/GERMANY Certificate in Participation in the Bullion High Speed System Machine(BH001) In Machine operation and Maintenance

LANGUAGES

- English Youruba Twi
