Expertise

- Experience as a machine operator
- Knowledge of production procedures
- Analytical skills
- Attention to detail
- Teamwork
- Physical stamina and strength
- Handle heavy equipment
- Work independently
- Multitasking ability
- Integrity
- Good verbal communications skills
- Active listening ability
- Can mentor and teach colleagues with less experience
- Problem-solving skills

Language

- English: Full Professional Proficiency
- Hindi: Native
- Urdu: Native

PERSONAL PROFILE

As a highly skilled machine operator with more than 10 years of experience in a chocolate factory, I am confident in my ability to manage and maintain the production line to ensure efficient and high-quality chocolate production. With a strong understanding of chocolate manufacturing processes and machinery, I have a proven track record of meeting production targets, reducing downtime, and minimizing waste.

My technical skills include operating, monitoring, and troubleshooting complex machinery, including tempering machines, mixers, conveyors, and packaging equipment. I am skilled in performing routine maintenance and cleaning tasks to ensure equipment operates at optimal performance. In addition, I am trained in quality control techniques and have experience in conducting product inspections and implementing corrective actions when needed.

EXPERIENCE

MACHINE OPERATOR SEVILLE PRODUCTS LLC

Feb 2013- Present

- Operating process equipment (Chocolate Enrobers, Caramel Cooker, Chocolate Tempering Machine) through HMI and doing in- process Quality
- Checks (online) like Chocolate Temper index, and weights control as per SKU of run to ensure they are within targets.
- Operating packaging machine (Bosch pak201)
- Assigning and supervising support staff (man power 10 people) during changeovers, line cleaning and shut down activities.
- Carrying out Preventive Maintenance (Monthly, Half yearly etc.) with maintenance team like belts changing, gearbox oil changing& pumps overhauling, bearing replacement etc. during annual shutdowns while adhering to checklists
- Trouble shooting of the process equipment like pumps, chillers, blowers, motor drives, pneumatic controls for any abnormalities during production and reporting findings for quick actions to eliminate unnecessary and un- planned downtimes.
- Monitoring, recording and controlling process parameters during production and ensuring they are always on targets.
- Keeping the working area always cleaned, well organized (5s) while adhering to set GHP & GMP standards.
- Carrying out preventive maintenance(greasing), attending to minor breakdowns like wire belt repairs on Enrobing machines while on duty

TRAINING LICENSE

- Licensed Light Tractor driver (Issued in Dubai)
Expiry Date: May 2026

SKILLS

- **Technical skills:** proficiency in operating and maintaining specific types of machinery, including knowledge of setup, programming, troubleshooting, and quality control. This may include equipment such as lathes, mills, grinders, drills, or specialized manufacturing equipment.
- **Safety skills:** ability to follow safety guidelines and procedures to ensure the safe operation of machinery and minimize risks to oneself and others. This may include knowledge of lockout/tagout, personal protective equipment, and hazard identification and mitigation.
- **Quality control skills:** ability to inspect products or materials to ensure they meet specifications and identify defects or non-conformities. This may include using gauges, calipers, or other measuring tools, as well as conducting visual inspections or tests.
- **Attention to detail:** ability to maintain focus and accuracy during long periods of machine operation, noticing and correcting errors or abnormalities in the production process.
- **Communication skills:** ability to communicate effectively with other team members, supervisors, or engineers to report issues or problems, exchange information or instructions, and work collaboratively to improve production processes.
- **Problem-solving skills:** ability to identify and troubleshoot problems with machinery or the production process, proposing and implementing solutions to minimize downtime and optimize performance.
- **Mechanical aptitude:** ability to understand and interpret technical specifications and diagrams, as well as a general knowledge of mechanical principles and techniques.
- **Time management skills:** ability to prioritize tasks and work efficiently to meet production targets, while ensuring quality and safety standards are met.
- **Adaptability:** ability to adjust to changing production demands or equipment, quickly learn new skills or techniques, and work effectively in a fast-paced, dynamic environment.
