INTERNSHIP

Star engineering works Pvt. Ltd.

(Star engineering works deals in fabricating and erecting a wide range of structures, equipment, and machinery for various industries.)

Key Learnings:

It is a type of internship that is usually offered to students studying Engineering, Technology or Sciences, which involves gaining practical work experience in an industrial setting. This training provides students with the opportunity to apply theories and principles learned in the classroom, in a real-life industrial environment. It was a wonderful learning experience at STAR ENGINEERING WORKS. I learned how to adjust myself in the work environment, how to deal with people at work and I also learned how to negotiate in market and make relationship in the market. It's a good quality experience.

PROJECTS

Fused deposition modelling

Influence of process parameters on mechanical properties of fused deposition modelled tensile test specimen of A.B.S
