- Record taking, routine maintenance, Daily Monitoring and General servicing of the plants and making sure of the Good working conditions.

ORGANIZATION: APOSTOLIC FAITH CHURCH HEAD-QUARTERS LAGOS 2014- till date

Position: PLANT OPERATOR

Job duties:

- Maintaining record keeping of daily plant activities and usage
- Repair, service and maintain two double 350 KVA site power generating plants
- Check and service all technical equipment's on the site
- Conduct and carry out proper site housekeeping innovative planning for day to day activities on the site, based on my experience as a team player and also a project manager.

ACHIEVEMENTS

- During the periods of my training as a young Engineer, I was able to administer and manage Design outlines, Installation of plants / Power Generators, managing the troubleshooting and servicing at the same time.
- As a team player, a good moral life without regional and Ethical racism was not allowed in the team, there by making the output and our core results perfect and up to date. I believe in a level playing grounds with my colleagues and team members letting them understand that we have to work with less supervision and deliver with brisk and time schedule.
