EDUCATION

Diploma of Higher Education: Diploma in Electrical and Electronics Engineering **Orphanage Polytechnic College**, Malappuram, March 2021

Certificate of Higher Education: Computer commerce **MES Higher secondary School**, Malappuram, March 2018

LANGUAGES

Malayalam: Native language

English: B2

Upper intermediate

Hindi: B2

PROFESSIONAL SUMMARY

Detail-oriented and orderly Electrical Supervisor with top-notch skills in running wires and making connections with strong soldering, welding and repair expertise. Highly trained in Electrical Engineering. Ready to offer two years of experience in field and pursue dynamic, growth-oriented position.

WORK HISTORY

April 2021 - Current

Yem Key Associates - Electrical Technician, Kerala, India

- Installed and tested new Electrical equipment.
- Supervised colleagues and contractors in safe systems of work, conducting risk assessments and gas testing procedures.
- Reviewed engineering design proposals and completed accurate drawings to determine feasibility and safety compliance.
- Built cabinets, switches, and electro-mechanical assemblies.
- Carefully followed product manuals, technical specifications, and design drawings in engineering work.
- underground cable operations and fittings
- Hospital electrical wiring and maintenance work
- Plumbing and Fitting
- Inspected electrical systems, equipment and components to identify hazards, defects and repair requirements.
- Installed and wired electrical hardware, including transformers, junction boxes, service panels, electrical boxes, switches and circuit breakers.
- Sourced and assembled components to meet client needs.
- Performed timely electrical system installation of conduit, wire, power distribution and motor controls.

- Tested and accurately diagnosed wiring faults, recording exact details to maintain traceability.
 - Operated electrical measuring devices appropriately, including analysers, amp metres and voltmeters.
 - Installed, tested and modified circuit breakers, controls, fuses, lights and motors.
 - Ensured safety of electrical work and systems through regular, rigorous testing.
-

SKILLS

- | | |
|---------------------------------------|--------------------------------------|
| • Team leadership and supervision | • Electrical failure management |
| • Employee training and development | • Budgeting controls |
| • Reporting and documentation | • Certified Electrical License |
| • Performance analysis | • Electrical panel upgrades |
| • Project oversight | • Electrical diagnostics |
| • Project scheduling | • Electrical provisions installation |
| • Meeting coordination | • Pipe installation expertise |
| • Project support | • Technical support |
| • Records and database administration | • Safety compliance |
| • Business communications | • Control circuit troubleshooting |
| • Electrical installation and repair | • Strong customer focus |
